-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-4 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For clarity and/or definiteness, it appears that --said-- should be inserted after "least" (claim 1, line 7), that "the" (claims 1 and 3, line 8) should be --a--, that "said the" (claim 2, line 1) should be --said--.

It appears that claims 2 and 4 are not further limiting.

For accuracy, it appears that --through a wall-- should be inserted after "hole" (claim 3, line 9).

All claims should be revised carefully to correct all other deficiencies similar to the ones noted above.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Young (US 6698683). Note second holders 60 and 62 which are fastened to the post 52.

Art Unit: 3654

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art in view of Jordan (US D461667) and Martorelli et al (US 5743485).

Applicant's admitted prior art is shown in fig. 7 but does not disclose a second holder. Jordan discloses a roll holder in which a plurality of standby rolls are provided and supported on a support post. It would have been obvious to a person having ordinary skill in the art to provide the admitted prior art apparatus with one or more second holders as taught by Jordan to provide one or more standby rolls. That the admitted prior art support post has a hollow interior such as a hollow post would have been an obvious matter of design choice to a person having ordinary skill in the art based on factors such as design criteria (such as to reduce weight) and costs (less material required). Martorelli et al discloses a roll holder 61 attached via a hole 63 in support post 10. It is deemed inherent that the holder is detachably fastened thereto. It would have been obvious to a person having ordinary skill in the art to provide the second holders as taught by Jordan as being supported in a hole on the post as taught by Martorelli et al to reduce the number of parts and therefore costs and to allow for detachability.
